PROFILE

Data Science undergraduate at BINUS University on a full merit scholarship, focused on ML engineering and applied GenAI. I build systems that survive past the notebook: RAG with hybrid retrieval and confidence gating, an agent that verifies its own numbers, a feature store serving in 22 ms. Most repositories ship with tests, CI, and Docker. Two years of client-facing work means I can present the work as well as build it.

PROJECTS

VERDICT ANALYST: Causal Analytics Agent

Python · Gemini · FastAPI · DuckDB · Docker · [Live demo](#)

Writes and runs its own analysis code in a locked Docker sandbox, then recomputes every number a second independent way (pandas against DuckDB SQL), so confidence is measured rather than claimed. Causal questions skip the language model and go to a deterministic statistics engine tested on recovering known ground truth.

FinSight v2: RAG over SEC 10-K Filings

Next.js · Supabase pgvector · Gemini · Vercel · [Live demo](#)

Answers strictly from 10-K filings, cited to the section, or refuses. Hybrid vector and full-text retrieval fused with RRF, one search per company so comparisons keep both sides, refusal gate set from measured data. On 936 chunks and a 22-question golden set: hit-rate@6 18/18, out-of-scope refusals 4/4, zero false refusals.

Feature Store: ML Feature Serving

PostgreSQL · Redis · FastAPI · Evidently · Docker · [Live demo](#)

Turns raw e-commerce transactions into 23 user-level features across an offline store (PostgreSQL) and an online store (Redis), serving a single user in roughly 22 ms with automatic fallback to PostgreSQL. Daily refresh, drift monitoring, 174 tests at 95% coverage.

Ask Nemi: The Resume You Can Talk To

Next.js · Gemini · Supabase pgvector · [Live demo](#)

A live RAG chatbot over a curated personal knowledge base with hybrid retrieval, a confidence gate and streamed, cited answers, so it admits what it does not know instead of inventing facts. Also runs as the chat in my 3D portfolio.

Also built: PhishGuard v2, a hardened phishing-URL detection API · PULSE, a streaming air-quality pipeline that retrains itself on drift · KENNETH, a live Jakarta parking app for a venture course team · a waste classifier benchmark (MobileNetV2 90.3% validation accuracy against a 54.5% baseline CNN) · ICEBERG, a real-time 3D portfolio.

EXPERIENCE

Admissions Marketing (Part-Time) · BINUS University

Aug 2024 to Present

Run campus tours, in-school workshops, and aptitude-test sessions, presenting weekly to prospective students, parents, and teachers. Personal record of 45 enrollments in a single month against a monthly target of 3.

Performing-Arts Coach (Freelance) · Jakarta

Jul 2025 to May 2026

Coached around 40 junior and senior high-school students for storytelling and monologue competitions. Students took 1st place at FLS3N Storytelling and advanced to the provincial round, alongside other city-level first places.

Content Creator & Event Organizer (Intern) · HOPHOP Office

Mar to Sep 2024

Content ideation and on-ground execution for the Genshin Impact x HopHop Indonesia 2024 event.

EDUCATION

BINUS UNIVERSITY

Bachelor of Data Science, School of Computer Science. Full four-year merit-based scholarship.

Coursework: Machine Learning, Deep Learning, Statistics, Databases, Big Data. BINUS Ambassador. DataHeist ML competition participant.

TECHNICAL SKILLS

LANGUAGES

Python (primary), SQL, R, JavaScript / TypeScript

MACHINE LEARNING

scikit-learn, PyTorch, TensorFlow / Keras, CatBoost, pandas, NumPy, SHAP

GENAI & LLM

RAG (hybrid retrieval, RRF, confidence gating), agentic systems, Gemini API, LangChain, pgvector

MLOPS & SERVING

FastAPI, Docker, GitHub Actions, MLflow, Evidently, Streamlit, AWS (SageMaker, EC2, Lambda)

DATA & STORAGE

PostgreSQL / Supabase, Redis, DuckDB

WEB & 3D

Next.js, React Three Fiber, Three.js, Blender

CERTIFICATIONS

NVIDIA Deep Learning (PyTorch)

RevoU Applied AI & Integration

DSarea AI Engineering & Data Mining

MySkill Data Analyst & Visualization

talenta.id n8n Automation

LANGUAGES

Indonesian native

English professional working (IELTS 6.5)

Mandarin elementary, still learning
