TECHNICAL SKILLS

- **PROGRAMMING LANGUAGES**
Python (primary), SQL, R, JavaScript
TypeScript
- **MACHINE LEARNING**
scikit-learn, PyTorch, TensorFlow/
Keras, CatBoost, pandas, NumPy, SHAP
- **GEN AI & LLM**
RAG (hybrid retrieval, RRF,
confidence gating), agentic systems,
Gemini API, LangChain, pgvector
- **ML OPS & SERVING**
FastAPI, Docker, GitHub Actions,
MLflow, Evidently, Streamlit,
AWS (SageMaker, EC2, Lambda)
- **DATA & STORAGE**
PostgreSQL / Supabase, Redis, DuckDB

CERTIFICATIONS

- **NVIDIA - Deep Learning PyTorch - 2025**
- **Taalenta.ID - N8N Automation - 2026**
- **Revou - Applied AI & Integration - 2025**
- **Dsarea - AI Engineering & Data Mining - 2025**
- **MySkill ID - Data Analyst & Visualization - 2026**
- **IELTS Certification - June 2026**

LANGUAGES

- Bahasa Indonesia (Fluent)
- English (Fluent)
- Mandarin (Basic)

PROFILE

"Ask" my CV directly at Al.nehemiah for further question

Data Science undergraduate at BINUS University on a full merit scholarship, focused on ML engineering and applied GenAI. I build systems that survive past the notebook: RAG with hybrid retrieval and confidence gating, an agent that verifies its own numbers, a feature store serving in 22 ms. Most repositories ship with tests, CI, and Docker. Two years of client-facing work means I can present the work as well as build it.

PROJECTS

All code at github.com/ne-he

VERDICT ANALYST: Causal Analytics Agent

Python · API Key · FastAPI · DuckDB · Docker

An agent that writes and runs its own analysis code inside a locked Docker sandbox, then recomputes every number two independent ways (pandas vs DuckDB SQL) to produce a measured confidence score instead of an LLM guess. Causal questions bypass the model entirely and route to a deterministic statistics engine. 164 tests passing.

FinSight: RAG Q&A over SEC 10-K Filings

Python · Gemini · FastAPI · BM25 · Docker

Hybrid retrieval (dense embeddings plus BM25, fused with Reciprocal Rank Fusion) across a 947-chunk corpus, with answers cited down to the filing section. Scored 100% retrieval hit-rate@6 and 100% out-of-scope refusal on a golden-set eval. A tuned confidence gate makes it say "not found" rather than invent a figure.

Feature Shopz: ML Feature Store

PostgreSQL · Redis · FastAPI · Evidently · Docker

Turns raw e-commerce transactions into 23 user-level features across an offline store (PostgreSQL) and an online store (Redis), serving a single user in roughly 22 ms. Daily automated refresh, drift monitoring, 174 tests at 95% coverage, deployed live on Hugging Face Spaces.

EXPERIENCE

Admissions Marketing | BINUS UNIVERSITY

Aug 2024 - Now

Run campus tours, in-school workshops, and aptitude-test sessions, presenting weekly to prospective students, parents, and teachers. Personal record of 45 enrollments in a single month against a monthly target of 3.

Performing-Arts Coach | Jakarta Provincial

July 2025 - May 2026

Coached around 40 junior and senior high-school students for monologue and Theatre competitions. Students took 1st place at FLS3N Storytelling and advanced to provincial level, plus 3 further city-level 1st places.

Content & Event Organizer | HOPHOP Office, Jakarta

Mar - Oct 2024

Handled content ideation and on-ground execution for the Genshin Impact x HopHop Indonesia 2024 event.

EDUCATION

Bachelor of Data Science

2024 - 2028

School of Computer Science | BINUS University

Full 4-year merit-based scholarship. Coursework in Machine Learning, Deep Learning, Statistics, Databases, and Big Data. BINUS Ambassador 2024. Participant, DataHeist 2025 ML competition.
